Secure Recycling Services

Secure Recycling Services is a recognized collector, recycler and refurbisher of electronic waste (E-waste) in Illinois. Secure Recycling Services is a division of Kreider Services. Residents may drop off used/out of date electronic items (see list to the right) Monday thru Friday between the hours of 9:00 a.m. - 2:00 p.m.

According to Illinois law (*Electronic Products Recycling and Reuse Act; Public Act 095-0959*), collectors may accept no more than ten (10) Covered Electronic Devices (CED) or Eligible Electronic Devices (EED) at one time from individual members of the public. ***CEDs and EEDs are identified in the listing to the right.***

Secure Recycling Services are not able to accept all E-waste. For a list of electronics not currently accepted by Secure Recycling Services please call (815) 288-1602.

Secure Recycling Services has 24 hour surveillance. **Violators who illegally dump electronic equipment (or other items) at SRS will be prosecuted to the fullest extent of the law.**

 Covered Electronic Device (CED)
 Eligible Electronic Device (EED)

Help the environment while helping others in need

Secure Recycling Services appreciates your diligence in protecting the environment by recycling obsolete electronics and keeping them from local landfills.

But being a good steward doesn't come free. Illinois law prevents Secure Recycling Services and other recyclers from charging residents to recycle their electronic equipment.

If you believe in the work of Secure Recycling Services and the mission of Kreider Services please consider a financial donation today.

\$5.00 donation will recycle one computer monitor and divert it from entering local landfills.

\$10.00 donation will recycle two televisions and divert them from entering local landfills.

\$20.00 donation will support, like other donations, the electronics recycling program and assist programs for individuals with a developmental disability.

Secure Recycling Services...

- ... removes the number one source of toxins from the solid waste stream.
- ... provides consumers with a secure source for the destruction of personal, confidential data.
- ... recovers commodities that can reduce the dependence on petroleum such as plastics. Every pound of plastic recovered saves a gallon of petroleum used to manufacture new plastics.
- ... creates new jobs here in northern Illinois, including de-manufacturing technicians, recovery technicians, equipment operators, truck drivers, engineering and manufacturing.
- ... generates funds that assist Kreider Services in helping persons with developmental disabilities grow.
